Love vibration make DNA cross over and Make love The First Cell of the Human Being Originates from Love & Arousal, Orgasmic Energy

**Our Parent Pass the Essence
of Life to the sex cell.**

Orgasms contain the best energy from the organs, glands, senses and the loving sexuality combined together to create new life.

when the egg and sperm come together in the first cell—this cell has the power to draw the Heaven & primordial force down, combine with it and form what comes to be a human. Just as when the first cell divides and multiplies, the subsequent copies from the original force retain the capacity to draw in the primordial force.

The third benefit is to all the organs. Start by 8 shallow and one deep and carry out a count of four nines (36) and stop when the count is completed. Rest and guide the Love and orgasm wrap around all the organs, so the life-force to be harmonized; it can cure coolness of the woman's gate. Practice three times daily (8hrs) and she will be cured in fifteen days.

The DNA renewal needs Arousal, orgasm, Love and compassion & the Earth Heartbeat

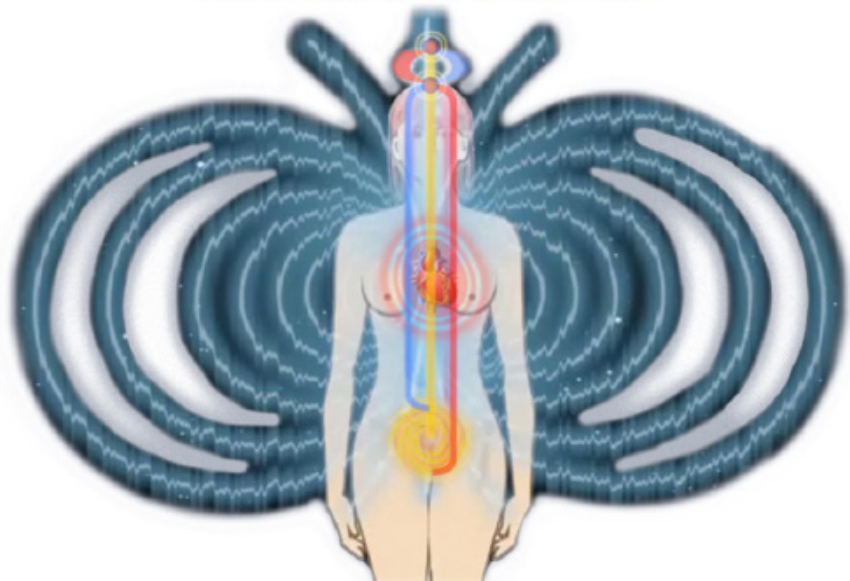

The two vital states, arousal, leading to orgasm, love and compassion are inextricably linked to love, this "love-vibration" creates a new chemistry and a new vibration. This 'special' vibration is measured at a frequency of 8Hz/Sec.

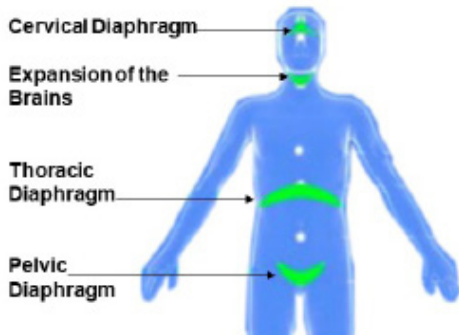

Schumann resonances, referred to as the Earth's Heartbeat, detected resonances at a main frequency of 7.83 Hz.

"As in the Macrocosm,
so it is in the microcosm" "
hence when we feel love or make love all cells and
the DNA actually 'make love' as well. The DNA cross
over, like two serpents intertwining in an erotic
embrace. They make love and give birth.
The cells that do not 'reproduce' will eventually die.

**Research On the Life Span of Worms by Wayne
A. Van Voorhies of the University of Arizona in Tucson**

Making Sperm is found to Shorten the Life Span In Worms

Researchers found that if the sperm production organs of the male nematode *Caenorhabditis elegans* were inactivated, the worms lived longer.

In normal worms requiring steady sperm production, the males lived only 8.1 days.

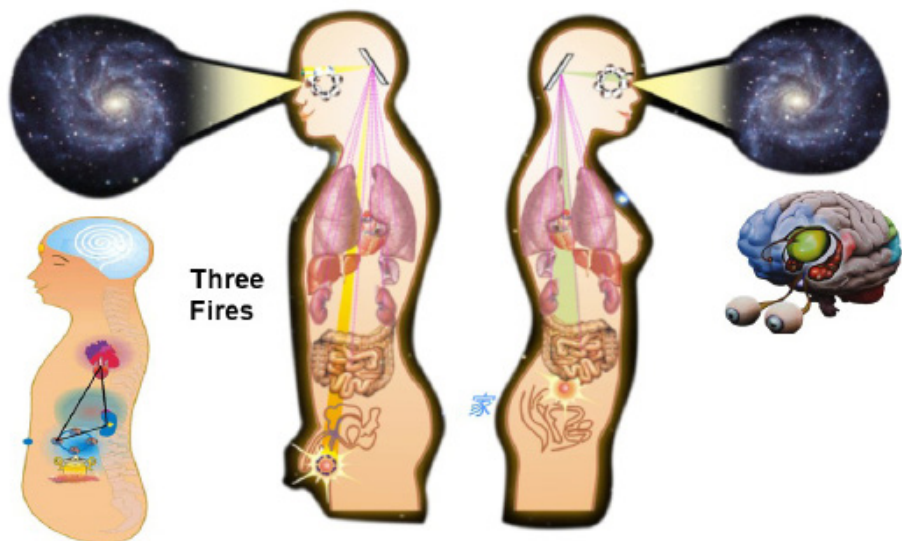

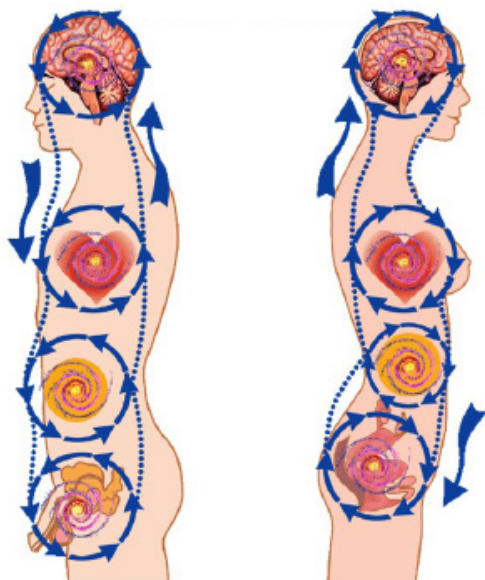

Monk Worm - Those male worms that were prevented from mating lived about 11.1 days.

Taoist Worm - Free from the stress of sperm production and still permitted to mate, the male survived almost 14 days.
